

Trolley Problem Assignment (2.5 marks)
 Due: 22 September 2023 Submit to <https://forms.gle/Y5YsLP6HwrEXqBEfA>

What would you do to T if it lost control, when

- 1.C is related to you by blood
- 2.Your sibling is part of B
- 3.All members of B are criminals sentenced to death
- 4.All members of B are innocent with family
- 5.Throwing A on the path of T will stop it.

Give reasons for your answers.

1. C is related to you by blood

I will divert the trolley away from C to save his life because family comes first.

2. Your sibling is part of B

I will divert the trolley away from where B is to save the life of everyone also included because B is family and family is very important and moreover, family comes first.

3. All members of B are criminals sentenced to death

I will not divert it, I will allow the trolley crush them to death since they are already sentenced to death, this can speed up their death as well eliminating them from the society on time.

4. All members of B are innocent with family

If all members of B are innocent with family, I will divert the trolley away from them to C because it better only C dies than having five innocent people die.

5. Throwing A onto the path of T will stop it

If A is not a family member or friend, I might consider throwing A to stop the trolley.
